Individual Presentation/Group Presentation/Class Participation Guideline:

Individual and group presentations and class participations will become the main focus of the sessions. In Individual presentation, students are expected to be able to have good communication skill to describe SDGS points which are related to global social movement. In group presentation students will be using Power Point system during their presentation to elaborate phenomena of global social movement. Individual and group presentations are the most effective in sharpening students ability in understanding the materials which are being discussed. Furthermore, Students also write academic paper on their individual and group presentation as their assignment. Finally, the discussion forum provides an opportunity to argue your position and to learn from others by listening to their comments and criticisms. We recommend that student read materials more than once. In class, we will examine completely all aspects of the situation: facts, assumptions, alternatives, and recommendations.

Final Paper Guideline **:** Written Examination
